

COPYRIGHT REGISTRATION TEMPLATE BLOCK DIAGRAM / SYSTEM ARCHITECTURE DIAGRAM

Final-Year IT Engineering Project • India

IMPORTANT: This template is for preparing an original block diagram as an Artistic Work for a copyright application. It is a student-preparation template, not the statutory Form XIV. The official Copyright Office portal/form must be used for the actual application.

1. When Can a Block Diagram Be Considered for Copyright?

A block diagram can potentially be protected as an original artistic work when the diagram itself contains original visual expression—such as the student's original arrangement, graphical presentation, symbols, typography, layout and annotations. Copyright protection concerns the expression in the diagram; it does not give exclusive rights over the underlying idea, system concept, algorithm, process or functionality merely because these are represented in the diagram.

- Use a diagram created by the student/team, not a copied diagram from a paper, website, textbook, vendor manual or GitHub repository.
- If standard symbols are used, the student's originality should lie in the overall original visual arrangement and presentation, not a claim to ownership of common symbols.
- If the diagram is simply a screenshot/export from third-party software/template, verify the software/template licence and do not claim third-party elements as original.
- If the diagram is used or capable of being used in relation to goods/services, the Copyright Rules contain additional requirements for artistic works; see the official guidance before filing.

2. Recommended Copyright Work Description

Field	Template entry
Class of Work	Artistic Work
Type	Original Block Diagram / System Architecture Diagram
Title of Work	<Exact title of the block diagram>
Project Title	<Final-year project title>
Version / Date	<Version and creation date>
Author(s)	<Student 1>; <Student 2>; ...
Applicant / Owner	<Student / Institution / Other legal owner as applicable>
Status	Unpublished / Published (select according to actual status)
Software/Project Context	<One-sentence description of project>

3. Template: Copyright Work Identification Page

Place this page before the actual block diagram in your internal submission package. The official portal may require the work itself in its prescribed format; this page is a preparation aid.

ITEM	DETAIL TO FILL
Title of Artistic Work	_____
Project Title	_____
Project ID / Batch	_____
Department / Institution	_____
Author 1	Name: _____ Roll No.: _____
Author 2	Name: _____ Roll No.: _____
Author 3	Name: _____ Roll No.: _____
Author 4	Name: _____ Roll No.: _____
Faculty Guide	_____
Applicant / Copyright Owner	_____
Creation Date	_____
Version	_____
Originality Statement	Created originally by the above author(s), subject to listed third-party elements, if any.

4. Template: Originality & Ownership Declaration

TITLE OF WORK: <Exact title of block diagram>

PROJECT: <Project title>

Declaration: We, the undersigned author(s), state that the block diagram identified above was created as an original visual representation for our final-year project. We have identified any third-party material, templates, icons, images or graphical elements used in its preparation. We do not claim ownership of third-party material. Ownership of the copyright in the original work is subject to the applicable institutional policy, project agreements and any assignment/NOC.

Author	Roll No.	Signature	Date
<Student 1>	<Roll No.>	_____	_____
<Student 2>	<Roll No.>	_____	_____
<Student 3>	<Roll No.>	_____	_____
<Student 4>	<Roll No.>	_____	_____

5. Template: Third-Party Material Declaration

Element used	Source	Licence / Permission	Used as-is / Modified	Action taken
<Icon/symbol>	<Source>	<Licence>	<As-is/Modified>	<Attribution/NOC>
<Template>	<Source>	<Licence>	<As-is/Modified>	<Attribution/NOC>
<Image>	<Source>	<Licence>	<As-is/Modified>	<Attribution/NOC>
None	N/A	N/A	N/A	No third-party elements

IMPORTANT: If all elements are original, write 'None' and retain evidence of how the diagram was created. Do not write 'None' if icons/images/templates were actually imported.

6. The Actual Block Diagram — Preparation Format

Create the final diagram on a clean page with:

- Exact project title.
- Figure title, e.g., 'Block Diagram of <Project Name>'.
- Clear, original boxes, arrows, labels and annotations.
- Consistent typography and spacing.
- Student/institution identification if required by institutional policy.
- Version/date in the internal master copy.
- No third-party watermark or copyrighted template unless permitted.
- No passwords, API keys or confidential credentials.

[INSERT ORIGINAL BLOCK DIAGRAM HERE]

Example block	Purpose
INPUT / DATA	User input, sensor data, images, etc.
PREPROCESSING	Student-defined processing stage
CORE MODULE	Main project functionality
AI / ALGORITHM	Model/processing module, if applicable
OUTPUT	Final result / prediction / control

Replace the example blocks above with the team's actual original diagram. The example table is only a layout guide and is not the copyright work itself.

7. Suggested File to Upload

File	Purpose	Suggested name
Final block diagram	The actual artistic work	ProjectName_BlockDiagram.pdf
High-resolution source	Internal evidence; retain original editable file	ProjectName_BlockDiagram_Source.svg/png/drawio/etc.
Originality/ownership declaration	Supporting internal document	ProjectName_BlockDiagram_Declaration.pdf
Third-party material register	Rights audit	ProjectName_BlockDiagram_ThirdParty.pdf
NOC/assignment	Where ownership requires it	ProjectName_BlockDiagram_NOC.pdf

IMPORTANT: The official Copyright Office online portal currently states that an Artistic Work is uploaded in PDF/JPG format. Verify the portal's current size/format limits immediately before submission.

8. Important: Block Diagram vs Software Copyright

If you are registering...	What the work represents	Typical approach
Block diagram alone	Original visual expression	Artistic Work
Source code	Original computer-program expression	Computer Software
Project report	Original written expression	Literary Work
Project logo	Original artistic expression + possible brand	Artistic Work; separately consider Trademark

A team may have multiple copyrightable works, but the Copyright Rules state that each application is in respect of one work only. Therefore, do not assume that one application automatically covers the source code, report and block diagram as separate works.

9. Special Check for Artistic Works Used With Goods/Services

The Copyright Rules contain an additional requirement where an artistic work is used or is capable of being used in relation to goods or services. In such cases, the application includes a statement to that effect and the prescribed Trade Marks Registrar certificate requirement. This is particularly relevant to logos/brand artwork and should not be ignored merely because the artwork is also a project diagram.

IMPORTANT: For a technical block diagram used only as project documentation, determine the facts before treating it as artwork used in relation to goods/services. If the same artwork is a commercial logo/brand asset, separately assess trademark implications.

10. Final Student Checklist

- ☐ The block diagram is actually created by the student/team.
- ☐ The exact title matches the copyright application.
- ☐ All actual authors/contributors are identified.
- ☐ Ownership is confirmed under institutional/project policy.
- ☐ Third-party icons/images/templates have been checked.
- ☐ The final diagram is saved in the official portal's accepted format.
- ☐ An editable master/source file is retained.
- ☐ The diagram contains no confidential credentials.
- ☐ If the diagram is a logo/brand asset, trademark requirements have been considered.
- ☐ If the project also contains patentable technical subject matter, patent filing timing has been considered before public disclosure.
- ☐ The official Form XIV and current portal instructions are used for the actual filing.
